Referral-Based Subscription & Deposit Platform

1. User Registration (Referral Flow)

- Existing users can share their referral link with others.
- New users visit the link and are redirected to the Registration Page.
- New users register using Email ID and Password.
- After successful registration, the user is redirected to their Homepage/Dashboard.

2. Homepage (Plan Selection)

- After login, users see multiple subscription plans/packages with details:
- Package name
- Price
- Duration / Validity
- Description or benefits
- The user selects a plan and proceeds to the Deposit Page.

3. Deposit Process

- The Deposit Page displays:
- A QR Code and Wallet Address for manual payment.
- A field to Upload Payment Screenshot.
- The user uploads the payment proof and clicks Submit for Approval.

4. Admin Deposit Verification

- The admin receives all pending deposit requests in the Admin Dashboard.
- For each deposit, the admin can:
- View user details, plan, amount, and screenshot.
- Verify payment manually.
- Approve or reject the request.
- Once approved:
- The deposit amount is credited to the user’s account.
- The user’s chosen subscription plan becomes active.
- The bot starts automatically based on plan conditions.
- The subscription fee is distributed across 15 referral levels.

5. Referral Commission Distribution

- When a new user’s subscription is activated, the system automatically distributes commissions across 15 levels of uplines.
- The percentage or amount for each level should be configurable in the admin panel.
- Admin can:
- Set or modify commission percentages for all 15 levels.
- View the full referral tree and user hierarchy.

6. Withdrawal Process

- Before requesting a withdrawal, users must complete their Profile:
- Email ID
- Phone Number
- QR Code
- Wallet Address
- After profile completion:
- Users can request withdrawal from their dashboard.
- The withdrawal request goes to the Admin Panel for manual review.
- Admin can:
- View all withdrawal requests.
- Approve or reject manually after verification.
- Once approved:
- The amount is marked as “Paid” in the user’s wallet.
- The user can view all withdrawals under Transaction/Withdrawal History.

7. Rank Management System

- Admin can manage users based on ranks.
- Ranks can be assigned manually or automatically based on criteria such as:
- Total deposit amount
- Total referral count
- Total team volume
- Activity status
- Admin can:
- Create new ranks (e.g., Bronze, Silver, Gold, Platinum, Diamond)
- Set eligibility criteria for each rank
- Assign or update ranks manually from the admin dashboard
- Filter or view users rank-wise
- Export rank-wise user lists
- Users can view their current rank and progress in their dashboard.

8. Admin Dashboard Modules

- User Management (View/Edit/Activate/Deactivate users, Rank assignment)
- Deposit Requests (Pending / Approved / Rejected)
- Withdrawal Requests (Pending / Approved / Rejected)
- Referral Tree View (User hierarchy up to 15 levels)
- Subscription Plan Management (Add / Edit / Delete)
- Commission Structure Settings (15-level control)
- Rank Management (Add / Edit / Assign ranks)
- Bot Activation Logs
- Transaction Logs
- Reports (Deposits, Withdrawals, Commissions, Ranks)

9. User Dashboard Modules

- Wallet balance overview
- Active subscription details
- Deposit history
- Withdrawal history
- Referral link & team details
- Commission earnings
- Current rank & rank progress
- Profile management (Email, Phone, QR, Wallet)

10. Notifications (Optional)

- Email alerts for:
- Successful registration
- Deposit approval/rejection
- Withdrawal approval/rejection
- Rank upgrade notification
- Admin notifications for new deposit/withdrawal requests.
